PUBLISHED COMMENTS

11/16/19 Called to facility by complaints of grease and grey water overflowing from ground tank and onto parking lot and into retention basin. Facility closed due to large sewer lateral break that caused backup onto the property and into the rain retention basin. No back up inside facility was noted. It was determined by inspection of plumber that sewer lateral is non functioning and needs repair. Due to the lack of the ability for this facility to remove waste water from the establishment, it is in the best interest of

public health to remain closed until repairs are made and re-inspection of facility is complete.-MC

11/17/19 On site, plumber beginning repairs. Rain retention basin was emptied by McGovern, Inc. Facility to remain closed.-MC

11/19/19 Facility inspected, repairs made outside and violations corrected inside. Permitted to re-open to the public tomorrow morning, 11/20/19 once all cleaning violations have been completed. -MC

The compliance status of this facility and a copy of this inspection report will be posted on the PA Department of Agriculture website.
