

Rob Lambert, PE, Howard Holden Coordinator of Capital Projects, and Carolyn Campbell, WRT, Landscape Architect appeared  
Parking along north side of Dixon Center has been reduced at the request of previous boards  
The addition, originally proposed was on the west side of the building, is now proposed on the east and north side of the building  
A stormwater pipe will be installed in the center of the entrance driveway  
They are complying on a voluntary basis with the new shade tree ordinance replacement schedule even though the original application was submitted prior to the new ordinance  
81 trees to be removed (less than previously proposed) – 135 replacements  
New plantings will occur in the understory along the entrance drive as well as along the neighboring property line  
A buffer will be planted along the property line  
John Hosbach will meet with the applicant on site to discuss the actual species and locations for the greatest impact and he will report back to the commission members  
Plans that are easier to read will need to be submitted during the process  
Return with the landscape plan during the process with trees labeled on the plan

Ardrossan Subdivision (Preliminary Plan)      2014-S-04      Approved  
Subdivide existing lot into 72 residential lots

John Snyder, Esq., Lisa Thomas Landscape Architect, and Dave Fiorello, PE appeared  
Deciduous trees will be placed in a buffer line along the rye field  
A buffer area will be placed along Newtown Rd. and another small one along the south property line  
John Hosbach will meet once a month with the applicant once construction begins to follow the progression with the trees

695 Clyde Road (Preliminary Plan)      2014-D-05      Conditional Approval  
Construct addition to school  
Relocate walkway

Kevin Momenee, PE appeared  
40" Maple near the proposed building is in jeopardy, but the applicant will attempt to save it  
The temporary classrooms on site will be removed  
25" tree will be removed    2 large canopy trees will be planted on site  
It was suggested to put footers cantilevered to keep as much construction away from the roots of the 40" tree - applicant will discuss with the architect  
John Hosbach will assess the condition of the tree as the school wants to save it  
Modified plan will be submitted to Engineering with assistance from the arborist

651 W. Wayne Avenue (Preliminary Plan)      2014-D-06      Conditional Approval  
Construct addition to school

Kevin Momenee, PE appeared  
7 trees to be removed – 24 trees will be planted (16 large canopy trees)

Move tree protection closer to the building if possible  
John Hosbach will assist with placement of replacement trees and species  
Modified plan will be submitted to Engineering with assistance from the arborist
